

NEW

B3060 **BREAK
THRU**

**LIBERTY
LINK**

With Brevant® seeds canola BreakThru hybrids, you get a step change in yield performance.

Early maturing LibertyLink® BreakThru hybrid with top-tier yield potential and Pod Shatter Premium Technology.

B3060, with Pod Shatter Premium (PSP) technology, packs a double punch as both the highest yielding hybrid in our lineup and the top-performing shatter product in the Brevant® seeds portfolio. B3060 features resistance to multiple Clubroot pathotypes and excellent Blackleg protection with both seedling and adult resistance. Plus, it is our earliest maturing LibertyLink® hybrid – 1.3 days earlier than B3019. This hybrid is a BreakThru on every front: yield performance, maturity, PSP, and industry-leading disease protection.

Yield Data		Product Attributes	
B3060	101%	Maturity	Early-mid maturity (Earlier than B3019 by 1.3 days)
InVigor® L343PC	100%	Clubroot	R - Gene (5); Pathotypes (2F,3H,5I,6M,8N,3A,3D,2B,8E)
72 locations, 49% wins		Blackleg	R - Seedling & Adult Resistance
2024-25 combined yield summary from field scale and IMPACT™ trial locations as of Oct. 29, 2025		Verticillium Stripe	3
B3060	107%	Early Growth	7 (Very Good)
Brett Young™ BY 7206LL	100%	Lodging	6 (Very Good)
12 locations, 75% wins		Plant Height	Medium
2025 combined yield summary from field scale trial locations as of Oct. 29, 2025
